SRINITHI P

Full Stack Developer (Java/Python)

About Me

B.Sc. Computer Science graduate with strong fundamentals in Java, Python, JavaScript, HTML, CSS, and React.js. Hands-on experience in developing web applications using Django, Flask, and modern frontend technologies. Familiar with UI/UX design using Figma and deployment platforms such as Vercel and InfinityFree. Passionate about building responsive web applications and continuous learning.

PROJECTS

Coffee House E-commerce Website | 2025

- Designed and developed a responsive e-commerce web application.
- Implemented product listing, shopping cart and basic order flow functionality.
- Applied front-end development principles to ensure clean UI and usability.
- Technologies used: HTML, CSS, JavaScript, Java, Servlet.

Email Reminder Application | 2025

- Developed a web-based email reminder application with CRUD functionality.
- Implemented automated email notifications using SMTP (Gmail).
- Managed reminder data efficiently using Django ORM and SQLite.
- Built a clean, responsive user interface.
- Technologies: Python, Django, HTML, CSS, SQLite, SMTP (Gmail).

Hospital Management System | 2025

- Developed a role-based hospital management application.
- Implemented appointment booking and CRUD operations.
- Built responsive Admin, Doctor and Patient dashboards.
- Managed database schema using Flask-SQLAlchemy and Flask-Migrate.
- Technologies: Python, Flask, HTML, CSS.

Slide & Solve Game (College Final Year Project) | 2025

- Developed a puzzle-based game to enhance logical thinking.
- Designed game logic, user interaction flow and score tracking.
- Improved user engagement through simple UI design.
- Technologies used: Python, HTML.

Career Objective

Aspiring Full Stack Developer with a B.Sc. in Computer Science, skilled in Java, Python, HTML, CSS, and JavaScript. Eager to build scalable web applications and contribute to innovative projects while growing technically.
